TreeCircus

The TreeCircus Experience

Learn about tree care, conservation, our environment and a healthy planet. This **energetic stage show** is interactive, educational and captivating for all ages.

Learn the ways of an Arborist as they **demonstrate tree climbing techniques** and **put YOU in the harness for a climb up too!**

TreeCircus pairs the talents of arborist and tree climbing champion Chad Brey with extreme tree advocate and entertainer Tim Womick.

Vocabulary and Concepts Discussed:

**TreeCircus in action on the
2012 California Arbor Day Tour**

- *Respect**
- *Particulate Pollution**
- *Cellulose**
- *Urban Forest**
- *Photosynthesis**
- *Soil**
- *Heat Island**
- *Erosion**
- *Transpiration**
- *Air**
- *Water**
- *Trees**
- *Habitat**
- *Shade**

Tim Womick

Chad Brey

"Now, back down here again.
Lift your knees and pull up
your bottom knot."

“What ‘J’ word do trees give us?”

Tim Womick loudly yells to the audience at the California State fair. Java...Jelly...Jammies...and my favorite: “jobs”. As a certified arborist, I can think of no other way to get the message across that arborists are the professionals that take care of trees. Our job is showcased by the Tree Circus through the introduction of Certified Arborist Chad Brey and the very visual act of climbing a “tree” to get the job done. Tim tells the story of tree value and then lets the audience know that something of value should be cared for professionally. --- Submitted by Dana Karcher, Davey Resource Group

TreeCircus In Action:

Britton Fund Ride Tree Planting, May 2012

What Folks are Saying

- *"Your program instilled in my students a sense of ability to participate in individual and community stewardship, inspiring action at both levels . . . your high energy presentation is very inspiring. It's the perfect complement to our new project kick-off."*
- *"Different students respond to different teaching styles and techniques. You have the ability to reach students on a level to make them do a behavioral change."*
- *"To my students, science IS a foreign language, not only did you entertain them, they understand it more, and your broad vocabulary interested them. They're still talking about you."*
